

Backend Developer in BlueThrone

We are looking for a highly skilled **Nest.js/ NodeJs** Backend developer.

The primary focus will be developing and maintaining Backend components in distributed environments following common practices and workflows.

Full-Time-Job, 100% Work From Anywhere!

Background:

BlueThrone is an exciting 100% “work from anywhere” startup company.

After fundraising a super successful seed round, we are currently in the Growth phase. Our founders are experienced in building successful companies in the mobile applications world, and we just got funding from top investors, who themselves brought their startup to a unicorn valuation.

They strongly believe in our successful business model and our ability to become a unicorn startup even faster than they did :)

Our business model is to acquire existing Mobile apps, appreciate them using Advanced marketing strategies, AI algorithms, and centralized technologic control infrastructure, and then drive massive growth based on the income from those apps.

And now?!

We are looking for hungry, challenge-seeker talents to join our worldwide dream team!

In BlueThrone, the Backend Developer will be responsible for:

- Compiling and analyzing data, processes, and codes to troubleshoot problems and identify areas for improvement.
- Collaborating with the front-end developers and other team members to establish objectives and design more functional, cohesive codes to enhance the user experience.
- Optimizing apps' performance.

- Proposing any upgrades and updates necessary for keeping up with modern security and development best practices.
- Make sure our backends are robust, secure, modular, and maintainable.

Skills and Abilities:

- Highly proficient with the nodejs/nest.js language.
- Good understanding of Cloud base solutions and architecture like AWS/GCP.
- Knowledge of functional programming and object-oriented programming paradigms.
- Experience with both consuming and designing RESTful APIs.
- Ability to write efficient, secure, well-documented, and clean backend code
- Eagerness and curiosity to deal with code and architecture written by others.

Advantages:

- Ruby (Big advantage +)
- Experience with web application development.
- Elasticsearch stack
- Fullstack - javascript/react/next.js skills.

Communication requirements:

- Clear status updates.
- Positive and solution-oriented mindset.
- Strong sense of ownership, urgency, and self-drive.
- Ability to thrive in a geographically distributed organization.
